

## APPROVED FINGERPRINTING LOCATIONS

Please see the information below for a list of approved fingerprinting locations for out of state and in state applicants.

### Approved Out-of-State Fingerprint Agencies

If you are obtaining your fingerprints outside the State of Nevada, you must first make a good-faith effort to have them taken at a law enforcement agency (e.g., a police department or sheriff's office). If you are unable to locate a law enforcement agency that provides fingerprinting services, you may use an FBI-Approved Channeler. A complete list of approved channelers is available at the website below:

Google search: [List of FBI-Approved Channelers for Departmental Order Submissions — FBI](#)

Out-of-state applicants are **required** to fingerprint on two hard cards (FD-258 cards).

**Digital fingerprint (live scan) transmissions cannot be received from out-of-state agencies.**

Fingerprints can be laser copied or ink pressed onto the FD-258 cards. No other card may be used besides the standard FD-258 card. Applicants are advised to contact the agency in advance to confirm availability.

### Approved Fingerprint Agencies in Nevada

Applicants obtaining fingerprints *in Nevada* may visit a law enforcement agency **or** a Nevada-approved private fingerprinting agency. Applicants have the choice of choosing either traditional ink or live scan fingerprinting. The cost of these services will vary. It is highly recommended for those who are in-state to complete live scan fingerprinting for quicker processing. Applicants are advised to contact the agency in advance to confirm availability.

To search **ALL** approved live scan fingerprinting sites via portal, visit the website below:
